

Enigma

This weave uses the same AR range as Byzantine, usually around 3.5. This chain consists of units of ten rings linked together with a further two rings.

1. Start by making a 2-2-2-2 chain.

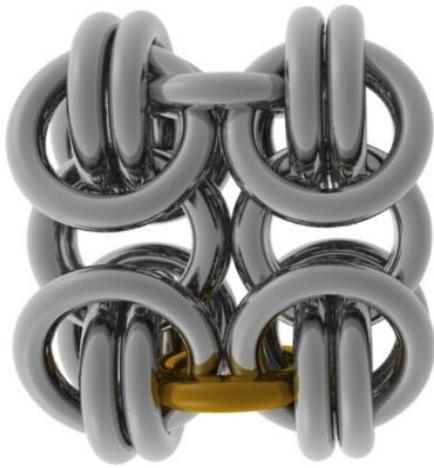

2. Fold back both end pairs of rings towards the centre.

3. Make another unit and lay it next to the first one.

4. Connect with a ring through the two folded-back rings at one end of both units (i.e. through four rings in all).

5. Then repeat at the other end of the units.

6. Add more units as required.
