Forårs Kæde

The AR is critical for this weave and should be between 4.1 and 4.2.

1. Add two open rings to a closed ring (shown in gold) and close them, then overlap the two outside rings (shown in silver).

2. Add a new ring through the eye (TE) in the middle and round the left hand side.

3. Add another new ring, but this time TE and round the right hand side. Then turn the whole section 90° towards you.

4. Add a new (silver) ring through the new eye formed by the first and third vertical (gold) rings then turn the whole set 90° towards you.

5. Add a new (gold) ring through the eye on the right and turn 90° towards you again.

6. Add a new (silver) ring through the eye on the right and turn 90° towards you.

Repeat steps 5 and 6 to the length required.
