

Rhinos Snorting Drano (RSD)

Please don't blame me for the name, it is really called that. A wide range of ARs will work for this weave. It is a variation of the Barrel weave (see end of tutorial).

1. Add two closed rings to an open ring and close it. Hold up by the ring in the middle.

2. Add a new ring (shown in gold) round the eye (RE) formed by the two overlapped hanging rings.

3. Hang a new (silver ring) through the eye (TE) formed by the two hanging rings.

4. Continue by adding another open ring with two closed rings attached.

5. Add a gold ring RE of the two new overlapping rings.

6. Continue adding units of four rings until the required length has been reached.

The similar Barrel weave is formed by adding two RE (gold) rings instead of one.
