

Shaggy Loops

This weave may be formed with rings having a wide range of ARs. It is very simple, but looks effective and has lots of movement.

1. Firstly prepare rings for the dangles by opening a ring, adding a bead and closing the ring. Prepare twice the number of dangles as there are rings in the base chain. Here, the base chain rings are shown in silver and the dangles are blue and pink.

2. Open the silver ring and add the other two ring/bead combinations to it. This is one unit.

3. Make another unit, but before closing the silver ring, add it to the first silver ring, between the two dangles. An extra ring is shown at the beginning of the chain for clarity.

4. Repeat to the length required.

The number of dangles may be increased to produce a denser weave if wished.
